## Summary

Determined and self-motivated Front End Web Developer that focuses on building accessible and functional web experiences. Passionate about user experience, minimalist design and serverless technologies such as Firebase.

## Experience

### Freelance Web Developer – [williamthomson.co.nz](http://williamthomson.co.nz)

March 2020 – Present

- Converted design mockups to mobile responsive and user-friendly websites.
- Utilized Git/Github and Netlify for both version control and continuous integration/continuous deployment.
- Collaborated with a designer to develop a visual brand for the client and created an online presence that increased clientele by 40%.
- Responsible for all written and verbal communication with clients.

### Gold X Events Crew – Cardrona Alpine Resort

June 2018 – November 2019

- Worked in a fast-paced team environment with the goal of consistently beating deadlines.
- Took the initiative to learn multiple skills that increased my value to the team.

## Projects

### North Swell – [north-swell.netlify.app](http://north-swell.netlify.app)

- An application built with React and TailwindCSS that saves local surf spots and updates forecasts in real time using an external API.

### Victoria Barendsen Psychology – [victoriabarendsenpsychology.co.nz](http://victoriabarendsenpsychology.co.nz)

- An information-based website to display psychology services that Victoria provides and allow clients to make bookings.
